

A thick black L-shaped frame is positioned on the left and bottom edges of the slide, framing the central text.

THE WORLD IS YOUR LAB!

T. Stantcheva, Ph.D.

Professor of Physics, Northern Virginia Community College

The Purpose of the Introductory Physics Lab

- Pertinent to Physics – it is Physics Lab, after all!
- Practical – teaching professional transferrable lab skills.
- Relevant to students’ goals – what do students need?
- Engaging – students must be present.
- Accessible – students may have non-academic obligations.
- Institutionally cost-effective.
- Flexible – immune to emergencies.

Physics Agile Labs (PALs)

- Raise the level and bring the students up!
- Public data, real-time streaming, remote detectors
- Arduino, Multimeters, Cell Phones, Microwave Ovens?
- PAL 1. [Speed of Light](#)
- Do you have ideas? Questions? Would you like to stay in touch?
