by Sean Willey (Wiley)

[Decolonizing Physics: facing and reshaping the dominant Western narrative of physics](#)

by Elissa Levy (Thomas Jefferson High School for Science and Technology)

[Scaling and Dimensions in Physics: Bridging Growth, Form, and Evolutionary Biology in Undergraduate Classrooms](#)

by Kausik Das (University of Maryland Eastern Shore)

[Teaching Quantum Computing: An approach accessible to high school and beginning college students](#)

by Alice Flarend (Bellwood Antis High School), Dr. Robert Hilborn (AAPT)

[Building the Quantum Workforce K-12 through Undergraduate Education](#)

by Jessica Rosenberg (George Mason University)

[Elementary Approaches to RLC Circuits](#)

by Carl Mungan (U.S. Naval Academy)

[Pirate Treasure Maps \(and other vector addition teaching activities for High School Physics students\)](#)

by Russell Youmans (Annandale HS, Fairfax County Public Schools)

[A Computer Project to Teach Orbital Motion](#)

by Phuc Tran (Brightpoint Community College)

[Fate of a gambler: A cautionary tale for cavalier applications of the central limit theorem.](#)

by Royce Zia (Virginia Tech)

[Using Computational Thinking in the Physics Classroom with STEM coding](#)

by James Newland (Bellaire High School/University of Houston)

[Exploring the use of Open Educational Resources in Physics](#)

by Nancy O'Neill

[Physics for Pre-health – Fostering Student Motivation](#)

by Jency Sundararajan (University of Virginia)

[A primer on Heisenberg's matrix mechanics](#)

by James Freericks (Georgetown University)

[Interferometry Using Very Affordable Radio Horn Telescopes](#)

by John Makous (Concord University)

[Transforming STEM Graduate Student Teaching: The Gateway2STEM Workshop](#)

by Nishchal Thapa Magar (George Mason University)

[Observing the Velocity Triangle](#)

by Lewis McIntyre

[Quantum Education in K12 and College: Findings and Recommendations](#)

by Emily Mercurio (University of Maryland, Quantum Leap Challenge Institute for Robust Quantum Simulation)

[The World Is Your Lab!](#)

by Tatiana Stantcheva (Northern Virginia Community College)

[Understanding our Changing Climate with Physics and Machine Learning](#)

by Maria Molina (University of Maryland College Park)

[Do You See What I See?: Smartphones as Visualization Tools](#)

by Rebecca Vieyra (PhET Interactive Simulations/Vieyra Software), Chrystian Vieyra Cortés (Vieyra Software)

[Beyond Representation: Data to Improve Equity in Physics and Astronomy](#)

by Rachel Ivie (AIP)

[Making Nuclear Magnetic Resonance Resonate With Students](#)

by Dedra Demaree (Blue Ridge School)

[Two-Year College Physics – OPTYCs at One Year](#)

by Kris Lui (AAPT – OPTYCs)

[Impostor Phenomenon in UMD Physics Graduate Students](#)

by Zach Steffen (UMD)

[NASA Space Grant Opportunities for Physics Educators in the Chesapeake Section](#)

by Nathan Harshman (American University)

[Science as Final form Ideas vs Science as Practice — Teaching High School Physics in Space Weather Studies](#)

by Ronald Freeman (Space Operations and Support Technical Committee AIAA)

[Integrating Quantum Science into the K-12 Classroom via Engaging Activities](#)

by Maajida Murdock (Morgan State University)

[Investigating the Lived Experiences of Underserved Students in STEM during the COVID-19 pandemic: A Phenomenological Study](#)

by Tonisha Lane (Virginia Tech)

[Virginia Space Grant Consortium STEM opportunities for High School Students](#)

by Rudo Kashiri (Virginia Space Grant Consortium)

[Six Center of Mass Demos](#)

by Jennifer Groppe (The Maret School)

[Color Mixing](#)

by Gordon Gainer (Prince George's County Public Schools)

[d, v, and a for Falling Putty Knife](#)

by Gordon Gainer (Prince George's County Public Schools)

[Levitation with Standing Waves](#)

by Patrick Stanley (University of Delaware)
