Off-Center Elastic Collisions Between Two Smooth Pucks
by **Carl E. Mungan**, *U.S. Naval Academy*
Proposal for a new terminology for Newton's 3rd Law
by **Tatsu Takeuchi**, *Virginia Tech*
Introducing Computational Methods in the Introductory Calculus-Based Physics Course
by **Brett Taylor**, *Radford University*
Physics of Light: Travel Course to England
by **Rachele Dominguez and Cedar Riener**, *Randolph-Macon College*
Computational Analysis of Photon Sail Parameters
by **Alex Keller**, *Randolph-Macon College*
Incorporating Arduinos into an Electronics Course
by **William M. Roach**, *Lynchburg College*
The Physics of Energy: Non-renewable and Renewable
by **Harold Geller**, *George Mason University*
Experimental Investigation of the Solar Capabilities of the InGaP Photovoltaic Device
by **Mac Lee**, *Randolph-Macon College*
Building A Working Model of The Falkirk Wheel As A Tool For Teaching Physics
by **Justin York, Jacob Henson and Dr. Pascal, Renault**, *John Tyler Community College*
PhysPort and Assessment
by **Deonna Woolard**, *Randolph-Macon College*
Analysis of horizontal projectiles using a simple apparatus
by **Upul Senaratne**, *Wor-Wic Community College*
Make and take Demo: “Vocal Visualizer”
by **David Wright**, *Tidewater Community College, Virginia Beach Campus*
PICUP project discussion on using computational methods in physics courses
Led by **Brett Taylor**
