Relativity on Rotated Graph Paper *by Roberto Saldago* (St Catherine U (St Paul, MN))
Physics and Art - a new class *by Sean Lally* (Jemicy School)
How to teach what a photon really is *by James Freericks* (Georgetown University)
Galileo's Law of Odd Numbers *by Jan Fiala*
Astrophysics in the Physics Classroom - AAPT-NASA HEAT Learning Modules OVERVIEW *by Anne Tabor-Morris* (Georgian Court University)
Superposition of Quantum Mechanics and SCALE-UP in the Classroom *by Gerald Feldman* (George Washington University)
Artemis II and Space Weather *by Elana Resnick* (NASA GSFC CCMC | ASRC Federal)
The Real Costs of Authenticity: Integrating ISLE and Project-Based Learning *by Andres Akamine* (Boyd J. Michael, III Technical High)
What's Happening with OPTYCs? *by Kris Lui* (AAPT - OPTYCs)
Video analysis assignments to supplement introductory physics labs *by Maxim Bychkov* (University of Virginia)
CosmicWatch: Bringing Particle Physics into the Classroom *by Spencer Axani* (University of Delaware)
Room 100: Make-and-Take Workshop *by Richard Terwilliger* (Retired Physics/Earth Science Teacher - Suffern Central School District, Suffern, NY)
My Favorite 5 Demonstrations *by Richard Terwilliger* (Retired Physics/Earth Science Teacher - Suffern Central School District, Suffern, NY)
Connecting an RLC Circuit to a Diode *by Carl Mungan* (U.S. Naval Academy)
Getting Your Students on Track: Applying the 5 A's of Alignment in Physics Labs *by Sithy Maharoof*
Designing Pedagogy for Quantum Entanglement *by Robert Hilborn* (University of Maryland)
Torricelli's Law: A capstone lab for AP Physics 1 that includes viscosity *by P.D. Kaplan* (Montclair HS)
Origami Physics : Circularity of Plane Shapes *by AdeBanjo Oriade* (University of Delaware)
Enhancing Advanced Laboratory Education: Resources, Activities, and Support from ALPhA *by Xin Du* (Widener University Department of Physics)
IceCube Masterclass : Exposing High-school students to the Frontiers of Astroparticle Research *by Paras Koundal* (Bartol Research Institute, University of Delaware)
Every Point Counts and Aligning Grades with Learning: Standards-Based and Standards-Referenced Grading in Practice *by Oren Levi* (Princeton Public Schools)
A table-top demonstration of magnetohydrodynamic flow *by Kausik Das* (University of Maryland Eastern Shore)
Beyond the Rindler Horizon: An Interpretive Quantum Puzzle for Students of Relativity *by William McConville* (Widener University)
Tesla coils in the classroom *by William A. Tobias* (University of Virginia)
Clarity through Competence: Supporting Physics Majors with Specifications Grading *by Veronique Petit* (University of Delaware)
Becoming The L.E.Mentor : a Journey in Science through Showmanship *by Art Pallone* (Penn State Harrisburg)
A Week-Long Astronomy Camp for Secondary School Students *by Deborah Skapik* (Friends' Central School)
